SKILLS

- Java 8 and Java Enterprise Edition (JEE)
- Spring Boot, Spring AI, MCP
- RESTful APIs
- Hibernate
- Tools : Maven, Gradle, Jira, BugDB
- Testing Frameworks : WebDriver, Karma-Mocha, Junit
- Microservices architecture (SAGA, CQRS, CircuitBreaker)
- Event Driven Architecture: Kafka, Oracle Cloud Streaming Service
- Oracle Cloud Infrastructure(OCI API Gateway, OKES, OSS,)
- AWS Architecture (EBS, RDS, pipeline, Bedrock)
- JPA
- Data Structures and Algorithms (DSA)
- Front-end skills: HTML, CSS
- Databases: oracle, SQL server, MongoDB
- Web technologies: JavaScript, TypeScript, React
- DevOps : Cloud deployment - AWS & OCI, Jenkins, Git, SVN, REST, Docker, Kubernetes
- Agile Project Management (Scrum)

Certifications

- Oracle Cloud Infrastructure Foundations Associate 2025
- Oracle Cloud Infrastructure AI Foundations Associate 2025

Summary

Accomplished Full Stack Java Developer at Oracle with over 15+ years of experience, specializing in Java, Spring Boot, JavaScript, microservices, REST API architecture, Kubernetes, and cloud-native systems. Expertise includes designing, developing, troubleshooting, and delivering scalable, distributed enterprise applications across diverse domains. Led and mentored cross-functional teams to successfully adopt new technologies, resulting in improved collaboration and innovative problem resolution. Successfully implemented Agile methodologies to optimize performance and enhance project delivery, significantly contributing to Oracle's competitive edge.

Work Experience

2014-05 - 2025-10

Consulting Member of Technical Staff

Oracle, Bangalore, IN

- Led the design and implementation of Oracle's ADF Faces framework for Oracle Fusion Applications (HCM, SCM, CX), delivering highly configurable enterprise UIs for global clients.
- Pioneered the development of a cloud-native microservices architecture for HCM Core HR modernization, establishing event-driven integrations with Kafka for streamlined asynchronous cross-service communication.
- Oversaw the development and maintenance of services written in Java 1.8 using Spring Boot, Microservices, Kafka (Oracle Streaming Service), and React JS, achieving seamless integration with existing systems and reducing deployment time by 60%.
- Served as Application Lead and Technical Architect, driving architecture, design reviews, effort estimation, and delivery execution, resulting in 30% successful project completions.
- Contributed to FMW Application development, focusing 30% on JavaScript and 70% on building the framework's open-source library using Java and Spring Boot, enabling enhanced functionality for developers.
- Demonstrated advanced expertise in JavaScript (ES6+), TypeScript, and React by leading several critical features and migration projects.
- Mentored and delegated responsibilities to team members, resulting in improved technical proficiency and accelerated solution delivery in Agile/Scrum environments.
- Architected scalable, secure, API-driven systems deployed via Docker and OCI Kubernetes (OKE), implementing autoscaling and observability to enhance system reliability.
- Secured APIs with OCI API Gateway, IDCS, OAuth2/JWT, and enforced strict RBAC and comprehensive data security policies across services.
- Collaborated closely with product, HR, and payroll teams to translate business processes into robust, cloud-native architectural solutions.
- Developed and launched multiple web applications using Oracle Visual Builder Cloud Service (VBCS), integrating with Oracle Cloud REST Data Service (ORDS) and Oracle Cloud Applications BOSS REST Services (Spectra).
- Utilized Spring AI Service with HCM microservices to automate HR operations and integrated built-in HCM AI features, such as resume parsing and employee policy chatbots, to streamline processes.

Achievements

- Enterprise applications across diverse domains. Recognized for a U Make a Difference Award - Oracle
- Best Performer of the Year - Aricent

2012-06 - 2014-04

Senior Software

Redknee, Bangalore, IN

- Developed enterprise Java applications using Spring, Hibernate, REST/SOAP APIs.
- Handled the development, analysis, debugging, troubleshooting, and delivery of enhancements and bug fixes, ensuring optimal system performance.
- Improved transaction performance by 20%.

2009-12 - 2012-06

Software Engineer

Aricent Technologies, Bangalore, IN

- Built backend systems using Java, Spring, Hibernate, and JSF for telecom platforms.

Education

2009-04

Master of Computer Applications

Biju Patnaik University of Technology

Biju Patnaik University of Technology, Rourkela * 04/2009

Master of Computer Applications
