EDUCATION

B.E. – Computer Science & Engineering

2017 - 2021

PROFESSIONAL SUMMARY

GitHub-focused Senior Systems Engineer with **4.8 years of total experience** as a **GitHub Administrator**, **GitHub SME**, and **GitHub Copilot Administrator** in large enterprise environments. Strong hands-on expertise with **GitHub Enterprise Cloud**, **Copilot governance**, **access management**, **security controls**, **GitHub API automation**, and **developer enablement**. Proven track record of leading **enablement sessions**, **Copilot hackathons**, and contributing to the **world's first GitHub Center of Excellence (CoE)**. Adept at partnering with developers, QA, leadership, and vendors to drive secure, scalable, and compliant GitHub and AI-tool adoption.

PROFESSIONAL EXPERIENCE

Senior Systems Engineer

2021 – Present

Infosys Limited | Bengaluru, India

- Served as **GitHub Administrator and Platform SME**, responsible for reliability, security, and governance of **GitHub Enterprise Cloud** across multiple teams.
- Functioned as **GitHub Copilot Administrator**, supporting org-level enablement, governance discussions, and AI-assisted development adoption readiness.
- Led organization-wide **developer productivity initiatives**, aligning GitHub, Copilot, and CI/CD practices with enterprise standards.
- Acted as trusted **technical SME for GitHub and Copilot**, collaborating with leadership, developers, QA teams, and external vendors.
- Core member of the **world's first GitHub Center of Excellence (CoE)**, supporting platform strategy, standardization, and best practices.

PROJECT HIGHLIGHTS

Enterprise GitHub Administration & Copilot Enablement

- Administered **GitHub Enterprise Cloud** covering org setup, repo governance, access management, and policy alignment.
- Managed **GitHub Copilot administration** including enablement planning, governance, and enterprise onboarding.
- Delivered **Copilot enablement sessions and live demos** covering AI-assisted coding and prompt engineering.
- Planned and executed **Copilot hackathons**; built **GitHub REST API automation scripts** to streamline admin operations.

GitHub Center of Excellence (CoE) Enablement

- Core contributor to the **world's first GitHub CoE**, driving enterprise-wide GitHub and Copilot adoption strategy.
- Defined **best practices, enablement models, and governance frameworks** with CoE leadership.
- Organized **multiple Copilot hackathons** across delivery units; primary coordination point for repo setup, access, and issue resolution.
- Guided teams on **Copilot usage patterns, prompt engineering, and responsible AI practices**; led large-scale onboarding across multiple locations.

Azure DevOps & CI/CD Administration

- Administered **Azure DevOps** projects, permissions, and pipelines; designed **CI/CD workflows** for automated builds, deployments, and testing.
- Resolved pipeline and repository issues to maintain platform stability and developer productivity.

Jira & Confluence Administration
